eGRAVEL

**NEW  
LIMITS...  
OR  
NO LIMITS**

314B - Blue/Grey ,Gloss

For those who live to go out of bounds, get ready to set new limits with the Subito eGravel. Get that first kick through the washboard up a climb, or extra jump through muddy ruts. Built on the ebikemotion platform, the Subito eGravel promises a little something extra when that kick is needed. Stable ride quality from a longer wheelbase, dropped chainstays and clearance for 650x47C tires offer the confidence to take the road less travelled. Just like our endurance models, the handling components have been tuned to offer a precise and predictable riding experience, so that you can get up to a little trouble without losing your grip.

**CLEAN INTEGRATION** · Integrated battery and cable routing; integrated PAS sensor; integrated HMI, with the main button used for the control of the motor (IWOC ONE) neatly integrated in the extension of the 3D+ cap. Internally cabled front and back lights powered by the battery and controlled through the IWOC ONE. STVZO-compliant front light offers 110 lumens for safety even on darker routes, and rear light also offers side visibility.

**USER-FRIENDLY** · BB access port to the battery, comprehensive user interface (app-web platform-support), one-button control with three levels of assistance, clear battery-level indicator.

**ALL DAY, ALL-ROAD GEOMETRY** · Just like our endurance models, the Subito's handling components have been tuned to offer a precise and predictable riding experience, to carve your way down a descent with confidence, on smooth or rougher roads. Add panier and fender mounts and you have full access to unlimited days in the saddle.

**EBIKEMOTION X35+ SYSTEM** · 6V / 250W hub motor installed in rear wheel, max torque 40NM, max assistance speed EU-25; NA-32 KM/h. 250Wh internal battery capacity that gives you approximately 100km of use, depending on the level of assistance, rider drag and altitude gain. 250Wh range extender can be purchased separately and doubles the possible range.
