## YOUR NEW POWER OUTLET

314A-Blue/Black, Gloss

When you want to push yourself through that extra 50km or take the steepest route to the top – and actually enjoy the views on the way up – or want to finally let go of the myth of the suffer-fest, the Subito eRoad is your ride. And with a sub-12kg bike that handles, fits, and responds at the top of its class, it may provide all that even without the assistance of the motor. But if you want that bit of extra tailwind, it's ready for you.

**CLEAN INTEGRATION** · Integrated battery and cable routing; integrated PAS sensor; integrated HMI, with the main button used for the control of the motor (IWOC ONE) neatly integrated in the extension of the 3D+ cap. Internally cabled front and back lights powered by the battery and controlled through the IWOC ONE. STVZO-compliant front light offers 110 lumens for safety even on darker routes, and rear light also offers side visibility.

**USER-FRIENDLY** · BB access port to the battery, comprehensive user interface (app-web platform support), one-button control with three levels of assistance, clear battery-level indicator.

**ALL DAY, ALL-ROAD GEOMETRY** · Just like our endurance models, the Subito's handling components have been tuned to offer a precise and predictable riding experience, to carve your way down a descent with confidence, on smooth or rougher roads. Add in panier and fender mounts and you have full access to unlimited days in the saddle.

**EBIKEMOTION X35+ SYSTEM** · 6V / 250W hub motor installed in rear wheel, max torque 40NM, max assistance speed EU-25; NA-32 KM/h. 250Wh internal battery capacity that gives you approximately 100km of use, depending on the level of assistance, rider drag and altitude gain. 250Wh range extender can be purchased separately and doubles the possible range.
