

ELECTRON PRO

PURSUIT EXTENSIONS

FIT FOR VICTORY INSIDE UCI LIMITS

ALL CARBON FIBER COMPOSITE
Light and stiff

CUSTOM ARMREST COMPATIBLE
Allows for 3D printed shapes

TIGHT TWO-FINGER GRIP
Precise handling

PRECISION CONTOURING
For maximum aero

FLIP-CHIP ASSEMBLY
Allows for 10mm reach adjustment
See EXPLODED VIEW

FITS ON ALL ELECTRON PRO BASE BARS
For flexibility and cost reduction

0-100MM STACK ADJUSTMENT

As per article 1.3.023 of the UCI technical regulations, the distance between the vertical line passing through the bottom bracket and the extremity of the handlebar may not exceed 75cm.

The distance can be increased to 80cm for morphological reasons and to 85cm for riders 190cm tall or taller. The table shows the distance between handlebar extremity and bottom bracket on various frame sizes (with the Flip-Chip in the forward position). Make sure to verify that your configuration meets the UCI regulation.

WEIGHT (360MM): 416g
BOTH HANDLES AND SMALL PARTS INCLUDED

PRO LAYUP CARBON

ARGON 18 ONENESS SYSTEM COCKPIT
