You asked for it: higher performance, more features, ready for more roads and even more miles. We answered: a bike designed for speed and comfort over all surfaces. The Krypton Pro offers increased tire clearance for versatility, a downtube storage compartment to carry tools and gear, and shorter chainstays for a more responsive ride.

From long rides on tarmac or cobbles to packed gravel races, whether it's to the edge of town or around the world, the new Krypton adds speed to any surface.
