

TECHSOLV HP

***High Performance Cleaning Solvent for
Mechanical and Electrical Equipment***

WWW.MECATECH-PERFORMANCES.COM

DEFINITION

- ◆ TECHSOLV HP is a combination of deoxidizing and degreasing fluids with fast evaporation rate and good solvent power.
- ◆ This product is specially adapted for cleaning and deoxidizing mechanical and tensionless electrical equipment.
- ◆ It does not alter metals, plastics, insulation and varnishes or paints.
- ◆ TECHSOLV HP removes water, moisture, greases, oils, tar and sludge.
- ◆ TECHSOLV HP is also suitable for spray cleaning of brakes, clutches and allows degreasing of mechanical parts before painting or surface treatment.

ADVANTAGES

- ◆ Formulated without chlorinated solvent.
- ◆ Very good wettability of surfaces.
- ◆ Specific formulation avoids any risk of stains (including on copper metals), and has no effect on plastic films, protective coatings or lubricants (PTFE).
- ◆ Rapid evaporation (about 1 minute at 20 ° C). Leaves no residue.

FICHE TECHNIQUE

HOW TO USE

- ◆ If necessary, switch off the equipment and installations and apply it to the surfaces to be cleaned by spraying or brushing. Possibly, wipe immediately with a cloth.
- ◆ Allow to evaporate completely before turning on the power.
- ◆ On fragile plastics, it is advisable to make a localized test to check the compatibility.

CARACTERISTICS

- | | |
|------------------------------------|-----------------------|
| ◆ Aspect | Clear |
| ◆ Colour | Colourless |
| ◆ Odour | Specific |
| ◆ KB value | 200 |
| ◆ Specific mass at 15°C | 730 kg/m ³ |
| ◆ Flash point closed vessel | -14.5°C |
| ◆ Copper blade corrosion | 1a |

PACKAGING

- ◆ Packaging: Can of 5 litres, Metal barrel of 30 litres
- ◆ Article number: 804005 - 804030
