

« Graisse Blanche PTFE » **WHITE GREASE PTFE**

HIGH PERFORMANCE PTFE REINFORCED CLEAN GREASE

WWW.MECATECH-PERFORMANCES.COM

DEFINITION

- ◆ Multi-usage - long-term lubricating grease,.
- ◆ For all small lubrication (hinges, bearings, ball joints, axles ...)
- ◆ Extreme pressure character and anti-wear properties reinforced with the addition of nano particles of PTFE (Teflon)
- ◆ Can be used on all types of metals and plastics.

PROPERTIES

- ◆ Protects against corrosion and prevents galling.
- ◆ Range from -40 to +140 ° C.
- ◆ Very high resistance to water washout.
- ◆ Aerosol usable in any position allowing very precise application in the most inaccessible places.
- ◆ Can be used on all moving parts.

HOW TO USE

- ◆ Shake the can before use.
- ◆ Apply to surfaces previously cleaned and dried.

PHYSICOCHEMICAL PROPERTIES

- | | |
|----------------------|---------------------|
| • Colour | white |
| • Odour | typical hydrocarbon |
| • Flash point | < 0°C |
| • Soap | Lithium |

SAFETY DATA

- ◆ Consult the SDSs of the products available on our site www.mecatech-performances.com. Professional use.

PACKAGING

- ◆ Sprays of 650 / 400 ml - Box of 12
- ◆ Art. # : 430012
