

Câbles Protector

PROTECTS CABLES AND CUSHIONING AGAINST RODENTS

VERSION 2 - MAY 2011

WWW.MECATECH-PERFORMANCES.COM

AL DATA

DEFINITION

- ◆ Sprayed film for the protection of wiring and cushioning against all kind of rodents and small mammalians (rats, squirrels, mice, martens, etc.). Protects rubberized and plastic parts of the engine compartment (cushioning, cables, radiator hoses, sheaths, etc...) from nibbling.
- ◆ Resists strongly against water and heat
- ◆ Leaves a strongly perfumed adherent film which is dry and not sticky.

PROPERTIES and ADVANTAGES

- ◆ The product is harmless for animals and humans
- ◆ Adherent film is stuck on the parts to be protected to ensure persistence and high-level efficiency
- ◆ No risk of damages of the engine components

OPERATING INSTRUCTIONS

- ◆ Shake the spray well before use
- ◆ Use on a cooled-down vehicle
- ◆ Spray thoroughly on all synthetic parts of the engine compartment
- ◆ Allow drying a few minutes
- ◆ Treat again every 2 months

PHYSICO-CHEMICAL CHARACTERISTICS

- **Colour** Colourless
- **Odour** Lavender
- **Density at 20°C** 0.79
- **INRS registration** n°9660
- **MEDDTL registration** n°25490
