IDS

Injector Dismantling Aid

VERSION 1 - FEBRUARY 2020

WWW.MECATECH-PERFORMANCES.COM

PURPOSE

- Thanks to its powerful formula which dissolves calamine and other deposits that seize the injectors, **IDS** enables seized injectors dismantling with or without extractor. High lubricating power.
- Injectors, spark plugs and glow plugs, probes.

ADVANTAGES

- **IDS** is a high-performance catalytic releasing cleaner. It is not only a powerful solvent that cleans carbon deposits and oil residues but also an oxide reducer and a lubricant.
- Thanks to its powerful solvent formulation and its GDA® anti-seizing technology, the **IDS** spray is very penetrating and enables to release the most stucked and seized injectors.
- Formulation with GDA® technology: allows an effortless dismantling and the re-use of highly seized parts by minimizing the risks of breakage.

INTRODUCTION AND OPERATING INSTRUCTIONS

- 405 mL spray can (net volume: 250 mL).
- Shake the spray well before use. The product will be more efficient on a slightly warm engine.
- Spray on the injectors or on the stucked / seized parts and let it work for at least 15 minutes before dismantling, with or without extractor. Let it work longer in case of massive deposits (carbon/oil residues).
- Active and very efficient formula. Do not use on / avoid prolonged contact with sensitive surfaces (plastics, paints, varnish).

SAFETY DATA

- Consult the SDS of the products available on our website www.mecatech-performances.com. Professional use.

PACKAGING

- Boxes of 12 spray cans.
- Reference 406012
