Treatment Cooling Circuit Cleaner  
Deoxidizing

[WWW.MECATECH-PERFORMANCES.COM](http://WWW.MECATECH-PERFORMANCES.COM)

## PROPERTIES

- ◆ Disperses sludge, oxides and tartar present in the cooling circuit.
- ◆ Restores an optimal functioning of the system, (pump, radiator, thermostat) and maximizes the heat exchange.
- ◆ Avoids breakdowns due to cooling problems
- ◆ Non-acid and non-corrosive formula, does not present any danger neither for the engine block nor the radiator; for a maximum effectiveness, the product can be left acting in the circuit for several hours.

## HOW TO USE

- ◆ Add the dose to the old coolant and let it act, leaving the engine idling until all deposits present in the circuit have been dissolved. Rinse thoroughly with water before refilling the cooling system.
- ◆ Compatible with all types of coolant and antifreeze (both standard as well as organic...) and all types of vehicles.

## PHYSICOCHEMICAL PROPERTIES

- |                          |           |
|--------------------------|-----------|
| ◆ <b>Color</b>           | Colorless |
| ◆ <b>Odour</b>           | Odourless |
| ◆ <b>Density at 20°C</b> | 1.10      |

## SAFETY DATA

- ◆ Consult the SDSs of the products available on our site [www.mecatech-performances.com](http://www.mecatech-performances.com). Professional use.

## PACKAGING

- ◆ Packaging : dose of 250 ml. for 10 L of capacity.
- ◆ Ref. : MT031
