

"DEGRIPPANT Echappement" High Performance Rust Releaser

HIGH PERFORMANCES LUBRICANT AND ANTI-SEIZING CATALYTIC RUST
RELEASER

www.mecatech-performances.com

PROPERTIES

- Lubricates and releases all mechanisms. Allows dismounting and reusability of heavily oxidized elements.
- Automotive, construction, industry areas.

ADVANTAGES

- HP RUST RELEASER is a powerful anti-seizing lubricant and acts as a reducing agent of oxides.
- With its modified silicones formulation, the spray HP RUST RELEASER is very penetrating and releases even the most seized mechanisms.
- The high effective and water-repelling properties brought by modified silicones protect the metallic pieces from future seizure.
- Machine-work operations (tapping, threading) on pieces treated with HP RUST RELEASER are easier.

HOW TO USE

- Shake well before use.
- Spray on the seized mechanisms and let it sit for 15 minutes or more before dismounting.

PRECAUTION FOR USE

- Under normal condition of use, the spray HP RUST RELEASER doesn't pose any risks of toxicity or need more precaution handling than general precaution applied to industrial lubricants and sprays (refer to warnings and cautions markings on the packaging prior to use).

PACKAGING

- Packaging: 650/400 mL spray – box of 12
- **Article Number: 405012**
