

TDA

Complete Treatment for Power Steering Circuit

VERSION 2 - JAN 2022

WWW.MECATECH-PERFORMANCES.COM

DEFINITION

- ◆ Triple Action :
 - Dissolves and Disperses sludge and deposits present in the circuits.
 - Regenerates seals and sealing rings.
 - GDA® anti-friction and anti-wear surface treatment.
- ◆ Stops leaks and seepages. Eliminates hard point points and operating noises.
- ◆ Restores optimal operation and ensures a maximum life span of the Power Steering system.
- ◆ Compatible with all Power Steering circuits which use an oil such as Dexron ATF IID (red).

OPERATING INSTRUCTIONS

- ◆ Lift up the front wheels of the vehicle.
- ◆ Empty the power steering circuit tank (using a clean syringe for oil).
- ◆ Fill it with TDA to maximum. Close the tank.
- ◆ Turn on the engine and turn the steering well from end to the other 10 times.
- ◆ Repeat operations 2 to 5 until all the can of TDA is used (4 to 6 fillings)

SECURITY DATA

- ◆ Consult the SDSs of the products available on our site www.mecatech-performances.com. Professional use.

PACKAGING

- ◆ Packaging : 2L-bottle
- ◆ Reference : MT026
