

DésOXclean

Version 1- June 2020

WWW.MECATECH-PERFORMANCES.COM

PROPERTIES

- **Cleaner Deoxidiser/ Decontaminant all surfaces : rims, bodyworks, shields/bumpers, hubcaps etc....**
- **Iron Decontaminant :** Remove the break lining metallic particles, remove marks and sources of rust stains from all surfaces.
- **Reveals the presence of the metallic contamination :** the colour of the product changes when iron particles are present.
- **Gives back a clean and shiny look to strongly oxidized rims.**
- Allows the **decontamination of bodyworks before polishing** and protection treatment (polish/wax) or **placing a sticker.**
- **Cars/ Industrial vehicles/ Motorcycles – Can be used** on all types of surfaces; paints, varnishes, metal alloys, plastics, chromes.
- **Neutral pH formula** that is non-corrosive and non-aggressive towards surfaces : aluminium, alloys, plastics...

OPERATING INSTRUCTIONS

- Spray uniformly and liberally on the surfaces to be decontaminated. The product changes from pink to wine-red.
- In the case of rims or bodywork extremely soiled, we recommend to first clean with our CAR'CLEAN car shampoo or our JANTLEMAN powerful rims cleaner for instance.
- Let react for 3 to 5 minutes, and rinse with high-pressure water.
- In cases of extreme soiling, repeat the operation with mechanical help (brush...).

PHYSICO CHEMICAL CHARACTERISTICS

- **Colour** Pink
- **Odour** Cherry
- **Doesn't like frost** Keep away from frost

SAFETY DATA

- Consult the SDS of the products available on our website www.mecatech-performances.com.
