

TP2 Fioul

Treatment Protection & Performances for domestic fuel

VERSION 2 - MARCH 2022

WWW.MECATECH-PERFORMANCES.COM

PROPERTIES

Complete additive detergent, new improved detergent formula, stabilizing and combustion catalyzer for domestic fuels.

- **Stabilizing:** protects the hydrocarbons from oxidation. Avoids problems of deposits and of corrosion in the static tanks during long periods of storage and in burners while heating. Very efficient on domestic fuels containing fatty acids methyl ester or hydrocracked and desulphurised oil fractions.
- Allows a longer storage period: over 12 months in static tanks.
- **Combustion catalyzer:** Improves the fuels combustion, increases the thermal efficiency and so reduces the fuel consumption. Slightly reduces polluting emissions (smokes, unburned fuels, soot...) and the clogging of heating unit and of smoke ducts. **Decrease of the smokes' Bacharach index from 2 to 3 points.**
- **Detergent:** avoids the formation of organic deposits. Keeps the pump, filtration and injection systems clean. Avoids clogging and breakdowns even with iodated fuels (curative effect).
- TP2 FIOUL is efficient on all kinds of fuels: domestic, low-sulphur, intermediate and heavy, NRG, containing FAME (fatty acids methyl ester).

DOSAGE

- 1 liter of TP2 FIOUL for 2000 liters of domestic fuel: for a protection against deterioration and for an optimal heating efficiency.
- In case of contamination by oxidation residues we recommend to treat 1000L of fuel with 1L of TP2 Fioul and to stir the fuel well.

CHARACTERISTICS

- Aspect : red oily liquid
- Density : 0,90.
- Flash point : > 62° C

OPERATING INSTRUCTIONS

- Mix with the hydrocarbon with a dosing pump or pour into the tank before filling it up to ensure a good blending.

SAFETY DATA

- Consult the SDS of the products available on our website www.mecatech-performances.com.

PACKAGING

- Reference : 174001 – 174005 – 174030 - 174200 - 174999
- 1L and 5L- cans
- 30L and 200L-iron barrels and 1000L-IBC

FRENCH TIPP PAID
