JAVORINA

Od roku 1947 kultivujeme zmysel pre detail a jemné procesy v spracovaní nábytku z masívneho duba. Z mnohých možností volíme cestu odbornosti a jedinečnosť prírodnej suroviny, ktorá nás naplňuje tichou sofistikovanou krásou a nekonečným potenciálom.

Poháňaní zvedavosťou a citlivosťou k meniacim sa potrebám moderného domova vstupujeme na nové teritória v oblasti technológií, dizajnu a zákazníckej skúsenosti. Vďaka inovatívnym postupom a hlbkej znalosti materiálu premietame silu a jemnosť dubového dreva do odľahčeného funkčného dizajnu. Pri skúmaní jeho hraníc a možností spolupracujeme s poprednými dizajnérmi zo Slovenska, Česka i zahraničia.

Vývoj a výroba produktu vychádzajú z úcty k esenciálnym vlastnostiam suroviny a naplňajú princípy zodpovedného podnikania spracovaním výhradne certifikovaného dreva z lokálnych lesov, uzavretým výrobným cyklom a dlhovekosťou výrobkov.

ABOUT JAVORINA

Since 1947, we have cultivated attention to detail and refined processes in solid oak furniture manufacturing. From many possibilities, we choose the path of expertise and the uniqueness of natural raw materials, which fill us with quiet, sophisticated beauty and infinite potential.

Driven by curiosity and sensitivity to the changing needs of the modern home, we enter new territories in technology, design, and customer experience. Through innovative processes and deep material knowledge, we reflect the strength and elegance of oak wood in a lightweight, functional design. While exploring its boundaries and possibilities, we collaborate with leading designers from Slovakia, Czechia, and abroad.

The development and production of our products are based on respect for the essential properties of the raw material and uphold the principles of responsible business by using exclusively certified wood from local forests, a closed production cycle, and product longevity.

SUROVINA

Dubové drevo je odolný, pružný a trvácny materiál, o ktorý sa naša civilizácia opiera po tisícročia. Pri tvorbe nábytku si ceníme jeho dobrú prispôsobivosť prostrediu, spoľahlivosť a výnimočné estetické kvality, ktoré sa s časom prehlbujú.

Naše technológie odhaľujú dokonalosť majstrovského diela prírody — bohatú, ale jemnú kresbu, vyváženú farebnosť a dlhotrvajúcu silu týchto ingrediencií. Jedinečnosť každého duba rezonuje v jednotlivých kusoch nábytku, ktoré majú svoj originálny vzhľad a charakter v závislosti od podmienok, v ktorých strom rástol.

Zameriavame sa na dub európsky. Surovinu prvotriednej kvality odoberáme z certifikovaných píl, ktoré spĺňajú naše vysoké výrobné štandardy. Spracovávame neraz stromy staré 80 až 100 rokov a zmyslom našej tvorby je najlepšie možné zhodnotenie každého z nich.

THE MATERIAL

Oak wood is a durable, flexible, and lasting material our civilization has relied on for centuries. In furniture making, it is valued for its good environmental adaptability, reliability, and exceptional aesthetic qualities that deepen with time.

Through our technology we reveal the perfection of nature's masterpiece — rich yet subtle grain, balanced coloring, and lasting strength of these ingredients. The uniqueness of each oak resonates in every piece of furniture, each with its own original appearance and character, shaped by the conditions in which the tree grew.

We focus on working with European Oak. We source raw material of the highest quality from certified mills that meet our strict manufacturing standards. We often process trees that are 80 to 100 years old, and the purpose of our work is to make the best possible use of each one.

VLASTNÁ VÝROBA A TECHNOLOGIE

S rešpektom k remeslu a prírodnému materiálu vyrábame všetok nábytok vo vlastnom závode. Komplexným prístupom k ceste našich produktov sme nadobudli expertné znalosti v danej oblasti. Vďaka spojeniu tradičných stolárskych postupov s najmodernejšími technológiami, ako je napríklad päťosové CNC frézovanie, dokážeme pretvárať masívny dubový materiál do jedinečných tvarov a konštrukčných riešení.

Naša výroba zahŕňa kompletný proces spracovania suroviny, od prirodzeného sušenia dreva cez precízne technologické procesy až po finálnu povrchovú úpravu, čo nám umožňuje kontrolovať kvalitu pri každom kroku a rozvíjať inovatívne prístupy napojené na dych prírody.

IN-HOUSE PRODUCTION AND TECHNOLOGY

Respecting craftsmanship and natural material, we manufacture all furniture in our own facilities. Through a comprehensive approach to our products' journey, we've gained expert knowledge in the field. By combining traditional woodworking methods with cutting-edge technologies like five-axis CNC milling, we can transform solid oak wood into unique shapes and structural solutions.

Our production includes complete raw material processing, from natural wood drying through precise technological processes to final surface treatment, allowing us to control quality at every step and develop innovative approaches connected to nature's breath.
