- The Heavy commercial vehicle segment had a growth of 1% in Q1 FY'24. The segment is expected to have positive traction during the year due to the encouraging macro economic environment.

Chola's Position

- Increased demand for Light commercial vehicle will help us garner higher volumes, we will continue to be cautious in this segment based on rural sentiments and upcoming harvest seasons.
- Any increase in demand for Small commercial vehicles will help us improve our market share together with our cautious approach to financing.
- Our exposure in this segment is 7% at a portfolio level. We are moving watchfully in this segment due to inflationary concerns and higher fuel prices.

Sector Outlook

- The Passenger vehicle (Car & MUV) segment had a growth of 10% in Q1 FY'24 with an all-time high sales in the first quarter of any previous year. This segment is supported by robust demand and is poised for double digit growth.
- The Two-wheeler industry had a growth of 11% in Q1 FY'24. Easing commodity prices and uptick in rural demand will be the key factors for growth in this segment during the year.
- Used vehicle business has contributed to 32% of our disbursement volumes and this segment is expected to have a buoyant growth during the year.

Chola's Position

- Our focus continues to be on retail customers especially in smaller towns and rural areas. We will continue to grow this segment in line with market trends.
- The company intends to focus on two-wheeler financing by maintaining a clean portfolio through quality underwriting.
- We are one of the key financiers in this segment and will continue to have a guarded approach with razor-sharp focus on collections.

Sector Outlook

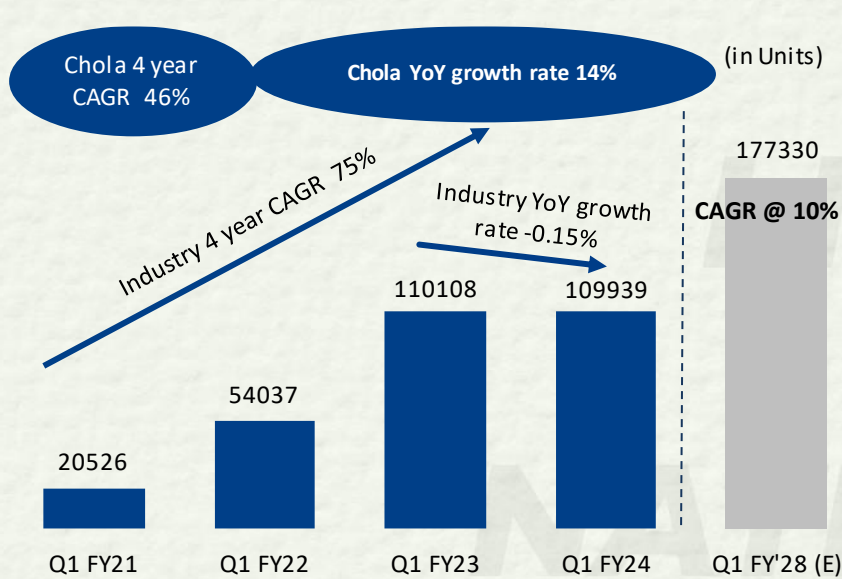

- The Construction Equipment segment had a growth of 14% in Q1 FY'24 supported by improvement in construction, mining activities and positive macroeconomic environment. Higher demand drive with the run up to elections will have a positive impact in this segment during the year.
- The Tractor industry had a de-growth of 2% in Q1 FY'24 due to a high base effect in the previous year. We expect this segment to have stable growth provided there is no adverse effects of El-Nino this year.

Chola's Position

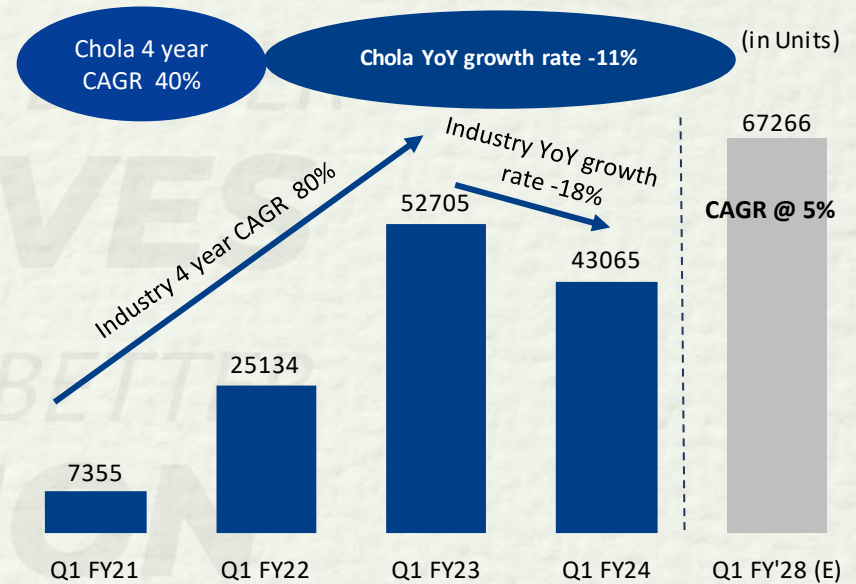

- Our exposure in this segment is around 7% at a portfolio level with emphasis on building a quality book.
- We will keep a close watch on this segment considering various external factors like El-Nino phenomenon, crop loss and uneven farm cash flows.
