NORMALIZED FINANCIAL NOTES

1) The impact of the exchange rate on foreign currency loans and current assets and liabilities, including cash and bank balances, has been removed

2) NCD & Currency Swap:

- **Normalized numbers are worked out after making necessary adjustments to reported numbers to reflect the effective cost of the synthetic USD loans.**

MANAGEMENT COMMENTARY

Mr. Bharat K Sheth Deputy Chairman & Managing Director

“All four of our shipping sectors did well in Q1, some better than others. Having a large part of our fleet in the spot market helped us take advantage of the market strength.

Strong cash flows from the business, coupled with an increase in asset values, resulted in a significant increase in Net Asset Value for the quarter.

A long period of underinvestment in energy seems to have caught up with the oil market, boosting demand for rigs and vessels. It is possible that we are past the worst of the offshore market.

We must recognize that recessionary pressures are building up, the impact of which is difficult to assess.”

USD/day	YTDFY22	YTDFY23	% change

Crude and Product Tankers

- The Russia-Ukraine conflict provided a fillip to tanker markets as it led to significant altering of trade flows and increased fleet inefficiencies. Spot earnings rose 4-5X y-o-y after hovering around opex levels for around 2 years.
- The recovery in spot earnings was led by Product tankers due to supply tightness in products, mainly in Atlantic markets.
- Global refineries were running at close to full capacity as margins remained at record levels during the quarter amidst low inventory levels.
- Crude and product trade remain 4% and 1% below pre-COVID levels.
- Increased congestion/stationary fleet helped curtail the impact of fleet growth

DRY BULK MARKET

Dry Bulk

DB Freight softened in Q1FY23 Y-O-Y, but Sub-Capes outperformed Capes

Dry Bulk

- During the quarter, spot earnings for Capes averaged significantly lower (down 32%), whereas those for sub capes rose 14% on a y-o-y basis respectively. This was the second straight quarter where sub capes continued to outperform the capesize spot earnings on an absolute basis.
- Overall, Dry bulk trade growth was flat to marginally negative (-0.5% to -1% y-o-y) during the quarter mainly impacted by lower iron ore and grain trade.
- Global Iron ore trade declined 2.5 % y-o-y mainly driven by lower exports from India and Brazil, whereas, global grain trade was down 10 % y-o-y chiefly due to loss of exports from Ukraine.
- Global Coal trade was up by 2 % y-o-y on the back of higher coal export volumes from Indonesia. Minor bulks trade growth continued to support the market.
- Whilst DB fleet grew by 3.5% y-o-y, congestion remained elevated during the quarter, curbing effective fleet supply growth. Current OB to Fleet ratio @ 7.10% continues to be at very low levels.

LPG (GAS) MARKET

The Great Eastern
Shipping Co. Ltd.

Gas

VLGC Spot earnings sustained healthy levels during Q1 FY-23 and were higher YoY in comparison to Q1 FY-22.

Gas

- VLGC spot earnings averaged USD 46,000 / day during Q1 FY-23 up 29 % y-o-y basis.
- Global VLGC trade grew 11 % y-o-y whereas fleet growth was 6.5 % y-o-y.
- Effective VLGC fleet supply was higher y-o-y due to lower congestion at Panama Canal & drop in scheduled dry docking

Dry Bulk	958	0.20%	0.56%	1.74%	0.93%	0.54%	1.85%	3.78%	4.02%	2.24%

- Scrapping for crude and product tankers was particularly restrained due to optimistic sentiment of an earnings recovery in the near term.
- Relatively high spot freight rates in the dry bulk market has deterred significant scrapping in the sector.
