International & Domestic Tailwinds

International Market

- Global iron ore prices touched \$133/t CIF China in Mid-March'2023 on back of reopening of China's economy. However sharp increase in iron ore supplies by global major and lower than expected demand pick up in China has led to a correction to \$117/t. Recent announcement by China to support housing & infrastructure sector might lead to increase in consumption of Iron Ore.
- World Steel Association (WSA) is forecasting steel demand to increase by a healthy 2.3% in 2023 and another 1.7% in 2024. This augurs well for demand for iron-ore and we expect prices to be well supported around current levels.

Domestic Market

- Iron Ore prices (NMDC) have seen a slight increase from Rs.3,660/t in Jan'23 to Rs.4,210/t currently. Prices have recovered well from the lows seen post imposition of export tax but remain well below last year levels of Rs.5,000/t. On the other hand, pellet prices after touching Rs. 10,200/Ton mark in Mrch'23 have dropped to Rs.8,800/Ton currently. Given the positive steel demand outlook, pellet prices should be well supported at current levels.
- India remains one of the bright spots globally for steel demand. WSA forecasts India's steel demand to increase by 7.3% in 2023 as compared to 8.2% in 2022. Indian government push for infrastructure with 33% increased capital outlay in addition to 75% increased outlay for railways augurs really well for the steel demand in the country, specially for long steel products.
