Sonata Retail Offerings

Business Challenges

- Outdated rail passenger reservation system
- Client server application has limited features
- Upgradation costs too high and time consuming
- Lack of user friendliness for day-to-day operations
- Reliance on manual process for ancillary product sales

Sonata's Solution

- Rezopia Rail Platform is a next generation rail reservation system capable of addressing all our client's needs, and more.
- Cloud-based platform was able to fulfil a lengthy wish list, ranging from end to end travel reservations, contracts, operations and distribution management.
- Multi-channel booking engine consolidated bookings and generated passenger manifest reports. Users were now able to book not only a train seat with a dynamic shopping cart, but also ancillaries like hotel rooms, transfers and activities.
- In addition, the Rezopia platform was integrated with SAP to send financial data of bookings a XML. AN eNet integration ensured suppliers were automatically paid on their due dates.

Benefits

- Increased business capability with web based application and efficient process for ancillary products sales.
- Train bookings for seat and berths are available in consumer site.
- Effective handling disruptions scenarios caused by natural disasters, track repair work, station interruptions
- Enabled business with platform that supports extending to providing uniform experience to customer for packing train with products like hotel, tours
- Scalable system implemented which can sale up to 6,000 bookings per day
- Omni-Channel booking experience across various distribution channels and devices

Sonata delivers a next-generation reservation system for a government owned railway operator in Australia

Solution

Sonata's Platform™ Framework

Platform™ is Sonata's unique approach to digital transformation and helps build open, connected, intelligent and infinitely scalable digital businesses.

With Platform™, organizations can support a connected ecosystem of customers, business, partners, and vendors and enable value exchange between these participants.

Platform™ Principles

- OPEN**
Easily accessible for users, ecosystem partners, and businesses to participate in
- CONNECTED**
So they are always-on, always connected
- INTELLIGENT**
To use the data generated in the platform to enable more efficient and meaningful transactions
- SCALABLE**
It gives the business the power to scale the platform by number of users, segments, & geography, easily

Applying Platform™

With the Platform™ approach, Sonata helped the tour operator make strategic choices up-front on the technologies and design patterns to build an open, connected, intelligent, and scalable platform. The Sonata team applied the Technology Design Canvas, a 16-point technology enablers framework, to evolving the client's platform capabilities in an iterative and incremental model.

- Sonata firstly implemented API-based integration and micro-services architecture to achieve the following functionalities:
- Faster on-boarding of travel and non-travel suppliers, insurance firms, and other service providers; integration with GDS
 - Integrated operational systems leading to better interconnectivity and automated processes
 - Selective scaling of all activities across the travel booking lifecycle and platform services
