Non-convertible debentures	500.00	CARE AA+; Stable	Reaffirmed
Commercial paper	300.00	CARE A1+	Reaffirmed

Details of instruments/facilities in Annexure-1.

Rationale and key rating drivers

CARE Ratings Limited (CARE Ratings) has reaffirmed the ratings of bank facilities, long-term and short-term instrument of Trent Limited (Trent). The ratings continue to factor strong parentage of Tata Sons Pvt Ltd (TSPL) and expected need-based support to Trent. The ratings factor the company's leading position in the domestic retail industry with 705 stores spread across more than 140 cities as on September 30, 2023 and presence in different retail formats/product categories like apparel, footwear, accessories, groceries through joint venture (JV) with the British major, Tesco PLC (Tesco), for Trent's Star Bazaar and association with Inditex (Zara & Massimo Dutti) in the high street fashion segment. Furthermore, the company has recorded healthy operating performance in FY23 and H1FY24 with total operating income growth of 83.37% in FY23 and 48.4% in H1FY24 on y-o-y basis while the operating margins improved to 13.39% in FY23 and to 16.65% in H1FY24. The improvement has been driven by increase in same-store sale and increase in average bill size. CARE Ratings expects the operational performance to continue driven by improvement in same-stores sales and addition of new stores going ahead with aggressive expansion under the brand Zudio.

The ratings continue to factor in Trent's seasoned management, strong capital structure and debt metrics (excluding lease liabilities) and a strong liquidity position reflected from cash and liquid investments of ₹794.58 crore as on September 30, 2023.

The ratings are, however, tempered by continued losses in some of its retail format like Booker India and JV like Star Bazaar necessitating regular funding support along with presence in the highly competitive branded retail industry which is vulnerable to changes in fashion trends/consumer preferences and economic cycles.

Rating sensitivities: Factors likely to lead to rating actions

Positive factors

- Improvement in financial profile on back of sustained same-store sales growth over the next two fiscals for all brands.
- Improvement in operational performance and improvement in return on capital employed (ROCE) above 25%.

Negative factors

- Increase in working capital intensity or weakening of debt credit metrics leading to further deterioration of capital structure.
- Significantly higher-than-anticipated support to subsidiaries/JV.

Analytical approach: Consolidated

Consolidated and factoring linkages with Tata Sons Pvt Ltd, applying parent notch up factoring the strong managerial and financial linkages. The subsidiaries and joint ventures being considered for consolidation are in **Annexure-6**.

Outlook: Stable

CARE Ratings have assigned Stable outlook on account that Trent will continue with a strong operational performance with improvements in the financial performance and robust liquidity backed by brand loyalty across various formats.

¹Complete definition of the ratings assigned are available at www.careedge.in and other CARE Ratings Ltd.'s publications

Detailed description of the key rating drivers:**Key strengths**

Experienced management team and strong parentage: Trent is part of Tata Group, enjoys strong managerial and financial support from TSPL which is expected to fund Trent on need basis as seen historically. During FY20, Tata Sons Private Limited infused ₹950 crore into Trent Limited for funding its expansion plans and back-end investments in warehousing and allied activities etc. Furthermore, being part of the Tata group, Trent enjoys strong financial flexibility. The company is headed by Noel N Tata (Chairman) who is assisted by a team of experienced professionals across various functions. CARE Ratings expects that the strong parentage will continue and the company will continue to benefit from experienced management in the medium to long term.

Diversified geographical presence, established brands and tie-ups with reputed retailers: Trent is one of the leading retail players in the Indian retail industry with the series of established brands across retail segments. Trent operates in both the value and lifestyle segments with an exclusive owned brand portfolio across Westside (Lifestyle), Zudio (Value fashion retail), Utsa (Ethnic Fashion retail). Trent operates around 705 stores in over 140 cities as on September 30, 2023, under various segments across India. Westside accounted for the majority of the company's revenues and derives its entire revenue from its own private label brands. Star stores are primarily operated by Trent Hypermarket Private Limited (THPL) - a 50:50 JV between Trent Ltd & Tesco PLC UK. Under the star brand, the company has 70 Star Hyper stores and Star Market stores.

Strong operating performance and improved profitability: Total Operating Income has increased from ₹4,488.13 crore in FY22 to ₹8230.12 crore in FY23, a growth of 83.37% led by increase in volume and price inflations. Total sales from Westside increased by 53.8% to ₹4,437 crore and total sales from Zudio increased 187.4% to ₹3,467 crore in FY23. Sales per Sq.ft from Star Bazaar also increased by 62.53% in FY23 to ₹22,594 sq.ft (PY: 13,901). Westside accounted for around 51% of total revenues of Trent. Simultaneously, the company has been focusing on increasing the footprint of Zudio by rapidly opening of additional 125 stores totaling 352 stores across 119 cities as on March 31, 2023. In H1FY24, the company recorded 48.39% growth YoY in revenue from operations at ₹5611 crore.

The gross margin for Westside moderated slightly at 55.1% (PY: 58.7%) however overall operating margin improved from 11% in FY22 to 13% in FY23. This was mainly due increase in average bill size for Westside from ₹2,796 in FY22 to ₹2,835.30 in FY23. The operating profit improved by 88% to ₹1,102.25 crore in FY23 which also improved the margins to 13.39% (PY: 13.03%). In H1FY24, the company recorded operating margin of 16.65% led by the on-set of early festive season.

Strong financial profile and liquidity position: The overall gearing including lease liabilities for Trent improved to 1.79x as of March 31, 2023 (from 2.02x as of March 31, 2022) and 1.68x as on September 30, 2023. The capital structure has improved, and the interest coverage ratio has also improved which led strong to net profits. The company's liquidity remains comfortable with cash and bank balances of ₹151.46 crore coupled with liquid investments to the tune of ₹643.12 crore for September 30, 2023.

Trent's inventory stocking policy is mostly on 'outright purchase' basis which makes it vulnerable to inventory obsolescence and blocking of working capital in case of a slowdown. However, the company's inventory per square feet has largely remained stable. Also, as majority of sales occur in cash, the collection cycle is low. The operating cycle remained stable at 34 days as of March 31, 2023 (35 days as on March 31, 2022).

Key weaknesses

Subdued performance of subsidiaries/JV; Positive momentum expected going forward: Trent's retail format like Booker India continue to incur PAT loss of ₹92.21 crore in FY23 (₹119.38 crore loss in PY) necessitating funding support. The JV and associates had mixed performance in FY23 with Trent Hypermarket Private Limited (THPL) reporting a loss of ₹103.10 crore in FY23 (₹136.95 crore in FY22); while Inditex reported a profit of ₹263.75 crore (PY: ₹148.69 crore) and Massimo Dutti also reported profit of ₹11.1 crore in FY23 (PY: ₹1.45 crore in FY22). Hence, going forward the FMCG segment is also likely to improve with higher footfalls in malls seen over early FY23.

Exposed to intensifying competition and economic cyclicality: Shoppers Stop, Lifestyle International, Aditya Birla Fashion, and other physical retailers are strong rivals of Trent. Online retailers such as Amazon, Flipkart, and Myntra pose a competitive threat for Trent. The overall growth of Trent's same-store sales could be impacted by increased competition from both brick and mortar and internet businesses. Because entrance barriers to the branded garment market are low, unorganised players pose a serious threat to the company's market share. The retail sector also remains susceptible to adverse macroeconomic environment for being discretionary in nature.

Liquidity: Strong

Liquidity remains strong led by cash and bank balance of ₹151.46 crore and liquid investment to the tune of ₹643.12 crore as on September 30, 2023. Therefore, excluding the lease liabilities, the company is net debt free as there is no long-term debt and no major repayment. The outstanding NCD of ₹500 crore has bullet repayment in FY27. The company has minimal working capital utilisation, additionally, the capital expenditure (CAPEX) requirement expected to be funded mostly by internal accruals.

Environment, social, and governance (ESG) risks

Being under the Tata Sustainability Group (TSG) the company identifies material sustainability issues despite being in the retail sector and not being exposed to most environmental risks. The company identified the Product Stewardship risk through recycling of waste and conservation of natural resources and has adopted a method to reduce it by reducing the fabric waste and using of Forest Stewardship Council (FSC) and Better Cotton Initiative (BCI) cotton. The company is also looking into usage of sustainable logistics to save cost and use alternative fuel.

Under the Corporate Governance, the company has adopted the Tata Code of Conduct which facilitates a fair working environment and appropriate behaviour by employees. The company, through its Business Responsibility & Sustainability Report, reports transparently all the compliance they have adhered. The company is adopting NGRBC Principles and Core Elements into its code of conduct through various internal policies and principle-wise disclosures.

Retail businesses face issues related to privacy as a result of the rising use of customer data brought about by the expansion of e-commerce. Therefore, to address this social risk, Trent's information technology teams' main areas of focus is cyber security. To reduce the risk, business systems are updated frequently. Due to their reliance on human capital for their safety and general well-being, companies in this manpower-intensive sector run the danger of experiencing disruptions. Furthermore, the company may face social risks as a result of human rights issues. Because it relies so heavily on outside suppliers, the corporation, as a retailer, is also impacted by other social aspects like sustainable products and supply chains, as well as ethical sourcing. Sustainability in the social and environmental domains is still emphasised by the corporation across its value chain.

About us:

Established in 1993, CARE Ratings is one of the leading credit rating agencies in India. Registered under the Securities and Exchange Board of India, it has been acknowledged as an External Credit Assessment Institution by the RBI. With an equitable position in the Indian capital market, CARE Ratings provides a wide array of credit rating services that help corporates raise capital and enable investors to make informed decisions. With an established track record of rating companies over almost three decades, CARE Ratings follows a robust and transparent rating process that leverages its domain and analytical expertise, backed by the methodologies congruent with the international best practices. CARE Ratings has played a pivotal role in developing bank debt and capital market instruments, including commercial papers, corporate bonds and debentures, and structured credit.

Disclaimer:

The ratings issued by CARE Ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse, or recall the concerned bank facilities or to buy, sell, or hold any security. These ratings do not convey suitability or price for the investor. The agency does not constitute an audit on the rated entity. CARE Ratings has based its ratings/outlook based on information obtained from reliable and credible sources. CARE Ratings does not, however, guarantee the accuracy, adequacy, or completeness of any information and is not responsible for any errors or omissions and the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE Ratings have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE Ratings or its subsidiaries/associates may also be involved with other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating/outlook assigned by CARE Ratings is, inter-alia, based on the capital deployed by the partners/proprietors and the current financial strength of the firm. The ratings/outlook may change in case of withdrawal of capital, or the unsecured loans brought in by the partners/proprietors in addition to the financial performance and other relevant factors. CARE Ratings is not responsible for any errors and states that it has no financial liability whatsoever to the users of the ratings of CARE Ratings. The ratings of CARE Ratings do not factor in any rating-related trigger clauses as per the terms of the facilities/instruments, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and triggered, the ratings may see volatility and sharp downgrades.
