

Built for the Long Haul

No matter how often you hit the road or what you decide to bring along, the Rōm Stacker car hauler trailer will get you there. This trailer is equipped with plenty of space and storage so you can haul multiple vehicles, including cars, ATVs, motorcycles and other toys. Available in several lengths for your car hauling needs.

RACE WITH THE BEST

This Rōm model was designed with serious automotive racing in mind. Our 18' tilt-deck lift provides better lifting capability for longer cars with wheelie bars, and the ramp door is designed with a longer transition flap to assist in loading low-profile cars. Because visibility is essential, we've added scene lighting on the side and rear. Packed with features, this model can be optioned with a variety of cabinet packages, electrical packages, insulation, scene lights, and more. **Details at ATCtrailers.com**
