

BUSH WALKING WITH ATLAS

If you would like to enjoy a walk in the bush with your friends and family contact us on 9956 2180 or atlas@sportshouse.net.au to organise it.

We will need a bit of lead time so that we can set you up properly with our equipment. This will allow for the most comfort during your experience.

You can use your own wheelchair with our freewheels for maximum comfort. These are designed to clip onto a solid foot plate or we have attachments to fit them to your folding wheelchair. These are designed for independent use without trained support. They are suited for grass or uneven terrain which is fairly firm. For those keen on some exercise you can push your manual chair as per usual or have one of your companions assist you with a push over the harder parts. Make sure you leave some extra space at the front so you don't run over anyone as the wheel will protrude about 350mm more than usual.

Cost- \$25 per day

Freewheel fitted to the solid footplate of a manual wheelchair

Or you can use one of our Trekers. These bushwalking wheelchairs are designed for bush walking with a team of hikers. You can either have your own team inducted in safe use of the Treker, or you can hire a trained support team from ATLAS. Talk to us about your requirements and we can customise to your needs. The Trekers are also suited to more strenuous bush walking and overnight camping. One of the features of these chairs is that they allow for your independent movement around camp after your day in the bush.
