Release Notes

Public Release

Version 1.0.09	
Features	• Removed the admin/Atlona login credentials from SSH. • Updated the default hostname to HDRH2H88-XXXXXXX, where XXXXXX represents the last six characters of the MAC address. • Removed unwanted messaging from the front panel LCD when a PWON command is received.
Bug Fixes	• Fixed an issue where special characters in a password could cause the web GUI to crash.
Known Issues	• N/A

Previous Releases

Version 1.0.04	
Features	• N/A
Bug Fixes	• Front panel LCD no longer stays on “Initializing...” when the system is fully initialized. • Routing no longer wrongly returns “Command FAILED”.
