FOCS™ ILS LARYNGOSCOPE BLADE

DESIGNED FOR EASY FIBER-OPTIC CONVERSION SYSTEM

The FOCS ILS laryngoscope blades offer an easy and cost effective alternative to expensive fiber-optic conversions. FOCS ILS blades are designed to fit all standard handles* allowing you to take advantage of fiber-optic illumination without the potential confusion from different fitting fiber-optic systems. FOCS ILS blades have a unique and patented design that hermetically encloses the fiber-optic bundle and halogen bulb within the blade. This feature allows the blade to operate on standard handles* and protects the halogen bulb during reprocessing.

* FOCS ILS Blade fits all standard/conventional handles manufactured to ISO 7376 standards

FOCS ILS Macintosh blade

FOCS ILS Macintosh FO Bundle

AT A GLANCE FEATURES

- Allows conversion to a fiber-optic system one blade at a time
- Illuminates bright and cool focused light
- Hermetically sealed making it water resistant
- Works with your current standard/conventional system
- Manufactured with surgical grade stainless steel
- Uses halogen bulb and fiber-optic bundles
