

Acuity 10x12 Wireless DR

X-Ray Panel

Compatible with traditional cassette holders

The Acuity 10x12 Wireless DR X-Ray Panel is a cost-effective solution to upgrading any traditional x-ray imaging suite. The slim panel design fits easily into any cassette holder, and provides superior image quality with low noise TFT and optimized Csl thickness.

FEATURES

- › Wireless, cassette-sized x-ray detector panel.
- › Easily transforms conventional x-ray rooms into a modern digital radiology suite.
- › Panel fits easily into traditional cassette holders, integrating with almost any existing equipment.
- › Lightweight panel weigh only 4.1 pounds.
- › Can improve productivity by giving clinicians up to three times the patient throughput as traditional systems.
- › Designed for multi-purpose clinical applications.
- › Rapid image acquisition allows clinicians to review HD processed images in as little as 6 seconds.
- › Mechanically optimized and engineered with metal unibody structure.
- › LED display indicates battery level.
- › Wireless interface with wifi sharing interface available.
- › Long battery performance rated up to 630 images per charge.
- › Includes 3-year hardware warranty.
- › Comes standard with slim dual battery charger that allows batteries to be simultaneously charging.

SPECIFICATIONS

Weight:
4.1 lbs

Active Area:
9.2 x 11.5"

Input Voltage:
DC 12V, 5A

Detector Type:
Direct deposition
Csl or Gadox

Pixel Pitch:
76 μ m

Resolution:
3.072 x 3.840

A/D Conversion:
16 bit

Communication:
Giga Ethernet / IEEE
802.11n (5 GHz)

X-ray I/F:
Lossless AED
