

## Avante Diagnostic Imaging Welcomes Cool Pair Plus

*Joining Avante Diagnostic Imaging to expand MRI service and repair capabilities*

March 22, 2021 – We are pleased to announce that Cool Pair Plus will be joining the Avante family of companies. Founded in 1995, Cool Pair Plus sells, services, refurbishes, and repairs MRI cryogenic equipment. The addition of Cool Pair Plus further strengthens Avante’s overall reach and capabilities in the diagnostic imaging market.

The Cool Pair Plus team brings a wealth of experience, strong repair capabilities, and quality customer relationships to Avante Diagnostic Imaging. We anticipate that Cool Pair Plus will immediately provide accelerated growth within the Avante Diagnostic Imaging platform.

As part of Avante Diagnostic Imaging, Cool Pair Plus will continue to operate in its current facility in Algonquin, Ill., and serve as Avante’s dedicated repair and service operation focused on MRI cryogenic equipment. The new partnership creates a stronger MRI service offering to better meet the needs of the collective customer base.

Cool Pair Plus focuses on exchange and repair services for MRI coldheads, compressors, adsorbers, and helium flexlines for all major manufacturers. In addition, Cool Pair Plus also provides on-site MRI magnet service including turnkey installations for these products. Like the other Avante companies, Cool Pair Plus operates from an ISO 13485:2016 certified facility, which is a testament to the company’s quality processes and procedures.
