

Avante Integra SL-X

Anesthesia Machine

The Ideal Anesthesia Machine for the Modern Operating Room

With a 15.4-inch display, the Avante Integra SL-X is designed for clinician convenience. An intuitive user interface and a high-definition touchscreen monitor make this anesthesia machine easy for clinicians to learn and use.

The Integra SL-X can be used on patients of all ages, and includes multiple safety features. Patient safety features include a backup O2 delivery system, total flow display, and an accurate mechanical anti-hypoxic device.
