Milano T50

Fully electric, multi-function power procedure table

The Avante Milano T50 compares with popular brands in terms of style and functionality, at a fraction of the cost. With four actuators to adjust height, backrest, leg rest and Trendelenburg positioning, clinicians are ensured a clear path to the patient.

Maximum Load Capacity:
440 lbs (200kg)

Trendelenburg: 25°

- Fully electric operation with four actuators
- Standard handheld remote control and foot pedal include automatic reset function.
- Adjustable and removable headrest.
- Seat and back rails fit a variety of medical accessories.
- Magnetic back remote control easily attaches to the side of the chair.

Milano E20

Advanced features and elegant engineering

The Avante Milano E20 is a high-quality alternative to popular procedure chairs, allowing medical professionals to save money without sacrificing features. The Milano E20 offers innovative engineering, first-rate materials, modern styling, and the most advanced features in its class, for a very competitive price. This chair comes standard with 180° rotation, hand remote & foot controls and standard arm rests — these are expensive add ons with most procedure tables/chairs.

This multi-specialty general procedure chair is available with options suited for most office-based medical procedures, including ambulatory surgery centers, procedure rooms, and examination areas. It naturally adapts to almost every physician, patient, procedure and environment. Dermatologists, plastic surgeons, oral surgeons, and ENT specialists have been using the Milano with great success.

The Milano E20 is comfortable for both the operator and patient alike, and ideal for lengthy procedures. It is wider than traditional procedure chairs and offers easy access to people with mobility difficulties, thanks to its adjustable height (lowers to 20.5"/52 cm). Its physician-configured adjustments provide excellent visibility within the operative field. It includes a wide variety of power positions and a smart "auto return" feature. The chair will lay completely flat in a table position.

- 180° chair rotation: Swivel feature provides for efficient access to multiple patient areas.
- Convenient "auto return" function restores the chair to original position and saves operator time.
- Lumbar support mattress: Ergonomic mattress design allows for lumbar-back support, patient head comfort and adjustable foot support.
- Sleek system with a small footprint.
- Foot pedal adjusts the height, back and level positioning.
- Tapered head allows for easy access to facial areas for the practitioner.
- Footrest is easily extended via a manual control knob.
- Stitchless mattress/covering allows for easy cleanup and sterilization.

Maximum Load Capacity:

440 lbs (200kg)

Chair Weight:

166 lbs (75kg)

Trendelenburg:

30°

Milano D20

A highly-adjustable, affordable chair for modern practices
