

Avante Milano OC

Oncology Chair

Designed for comfort during long procedures

The Avante Milano OC Oncology Chair features a three-layer memory foam mattress and handheld remote control, allowing patients to feel as comfortable as possible during lengthy chemotherapy treatments. The chair features a power cable holder and convenient roll-away wheel system, allowing clinicians to easily move the chair.

FEATURES

- › Oncology chair designed for patient comfort during extended chemotherapy.
- › Three electric movements: backrest, Trendelenburg, leg rest.
- › One synchronized electric movement: backrest/legrest.
- › Two manual movements: footrest adjustment and head rest inclination.
- › Convenient power cable holder allows clinicians to move the chair and sanitize the procedure suite.
- › Use the roll-away wheel system to move the chair easily.
- › Comfortable, five-section mattress with three layers of memory foam.
- › Stitchless upholstery is durable and easy to clean.
- › Handheld remote control allows patients to adjust the chair's positioning.
- › Three powerful electric actuators control chair movements.
- › Chair base is covered with durable ABS plastic for a streamlined appearance, while protecting the inner components.
- › Comes standard with handheld remote control, armrests, and accessory guides.
