

# Avante Titan XL

## Large Animal Anesthesia Machine

### Everything you need for large animal anesthesia

The Avante Titan XL Large Animal Anesthesia Machine is a complete anesthesia support system. The Titan XL is designed for use with Equine, Bovine, Zoology, and other large animal anesthesia techniques. The system can be used for spontaneous breathing or the user may utilize the popular Drager AVE ventilator which is an electronically controlled, time cycled driven anesthesia ventilator capable of delivering from one-half to 15 liters of tidal volume at 1 to 99 breaths per minute and I:E ratios from 1 to 2 to 1 to 4.5.

#### FEATURES

- For use with large animals.
- 5-15 liters of tidal volume available.
- 0-10 liters per minute O2 Flow meter.
- Ventilator is time cycled and electronically controlled.
- Frequency control variable from zero to ninety-nine breaths per minute in one BPM increments.
- Inspiratory flow controlled through operator adjustable regulator.
- Touch control tidal volume adjustment.
- Vapor exclusion system protects from both vaporizers delivering agent. One is in use, while the other shuts off.
- Top of machine acts as a storage shelf; particularly good for placing a monitor on.

#### SPECIFICATIONS

**Ventilator:**  
On/Off Switch  
Tidal Volume Ventilator  
Frequency Control  
Inspiratory/Expiration  
Inspiratory Flow

**Absorber:**  
Circuit Pressure Gauge  
APL Valve  
Insp./Exp. Ports

**Electrical:**  
110 V

#### INCLUDED

CO2 Absorber  
Bellows  
Refurbished Drager Ventilation  
2 Circuits  
Breathing Circuits

#### OPTIONAL

Foal Absorber  
Extended Inspiratory and Expiratory Ratios  
Large Animal Sized Endotracheal Tubes  
15 Liter Bags  
30 Liter Bags
