

GE Aisys CS²

Anesthesia Machine

Advanced anesthesia system designed for low flow care environments

The GE Aisys CS2 Anesthesia Machine is an advanced anesthesia system with digitally controlled vaporizer, ventilator, and gas delivery.

Features an illuminated workspace and 15-inch color touchscreen. With an intuitive, user-friendly design, clinicians can easily set up and use the GE Aisys CS2 in a variety of care environments.

FEATURES

- › Displays breath-by-breath spirometry: airway pressure flow, volume, compliance, PEEP, and airway resistance.
- › Wide range of ventilation modes offered: VCV, PCV, PSVPro, PCV-VG, SIMV, VCV, SIMV PCV, CPAP+PSV, and SIMV PCV-VG.
- › Streamlined, user-configurable settings for fast adjustments to agent, oxygen, and fresh gas flow.
- › Advanced Breathing system designed for low flow anesthesia:
 - › Small volume delivers quick response to changes in anesthetic agents and fresh gas.
 - › Visual indication via rising bellows helps prevent leakages.
 - › Intuitive user interface blends seamlessly into existing workflows.
 - › Autoclavable.
- › EcoFlow technology displays agent consumption, helping to reduce wasteful over-delivery anesthetic gases during non-automated low flow.
- › Auto alarm limits with tunneling alarms aid it optimizing alarm management.
- › Patient display is mounted on a moveable arm with complete rotation for clear viewing in countless positions.
- › User-friendly menus help to reduce set-up time, and could minimize training needs.
- › Illuminated workspace can be adjusted for a variety of care settings.
- › Central brake, metal work surface.
- › Supports horizontal and vertical mounting displays.
