

# Halogen III Portable

NEVER COMPROMISE  
START WITH YOUR VISION

## Step up to the next dimension in examination headlights

Unequaled clean, bright  
and focused portable light

Most examination headlights are simply bright flashlights mounted on a headband. The Halogen III series applies our advanced High Beam TriLens technology into a portable headlight. The result is an unequaled clean, bright, adjustable and well focused large spot of light.

Our Halogen III affords two hours of portable use time with the BFW™ ECOPAC™ rechargeable battery. Recharge ECOPAC™ up to 500 times, or use the Halogen III with our specifically engineered AC plug-in transformer.

Choose our form-fitted, sturdy and dual-adjustable Classic headband, or our soft Breath-O-Prene® Sport headband.

# Halogen III Portable

NEVER COMPROMISE  
START WITH YOUR VISION

Our Halogen III is the most advanced portable headlight system available today.

Halogen III is also available in a through-the-lens, true coaxial format. The True View is fitted with our mechanically advanced swivel to let you position the optic over your dominant eye. A tunnel centered through our True View optic results in undeviating, shadow-free vision with excellent light reaching deep into any body cavity.

Halogen III

## Specifications

**Product Codes**

- MID 9500  
Halogen III Classic
- MID 9520
