

# Skin Temperature Sensors

## FEATURES

Shore Medical's Skin Temperature Sensor is intended for monitoring a patient's surface temperature during surgery, postoperative recovery, or whenever a clinician needs to accurately assess skin temperature. The Shore Medical Skin Sensor has reflective silver material on one side to insulate the sensor from any heat generated by operating room lights or heat lamps.

- Versatile, noninvasive way to measure temperature
- Reflective back insulates sensor from heat generated by heat lamps or operating room lights
- Foam pad seals the area between skin and sensor to eliminate any ambient air that could affect temperature reading
- Hypoallergenic adhesive on foam allows for easy placement and removal
- Available with various temperature sensors including but not limited to 400, 700 and 10K sensors
- Disposable single-use design reduces the risk of cross-infection and ensures a quality product each time a new unit is used
- Latex-free
- All sensor wires come coiled and taped with Latex free Co-Adhesive tape\*
- Private labeling available

SSP 400

## ORDERING INFORMATION AND TECHNICAL DATA

Item No.	Description	Case Qty.
SSP 400	Sensor with 400 series sensor	50
SSP 700	Sensor with 700 series sensor	50

Temperature interface cables available for most monitors.

### Note To Patients:

All the devices shown here are prescription products and must be obtained from a licensed homecare provider or physician. Patients cannot purchase directly from Shore Medical.

400 series sensor
