

# Physio-Control LIFEPAK 20e

## Defibrillator

An all-in-one defibrillator and monitor that provides fast and efficient care

Designed for patient transport and crash cart use, the LIFEPAK 20e is a defibrillator/monitor that is both powerful and easy to use. This defibrillator can be operated manually or automatically. Other operating modes include setup, service, and archival. The LIFEPAK 20e was made to be easy to use, for both BLS and ALS teams.

### Code Management System

The LIFEPAK 20e includes an optional module, called the Code Management System. This module helps to prepare for emergencies and improve the overall performance for your hospital. The CodeManagement Module allows for easy collection and review of data, and provides the information that rapid response teams need for the best quality of care.

### FEATURES

- Large code clock to provide a centralized device for time management and documentation
- Compact and ergonomic design for easy patient transport
- Automatically sends patient and device data for hospital-wide tracking
- Monitoring includes: ECG (3 or 5 wire), capnography, noninvasive pacing, pulse oximetry
- 360J biphasic technology
- Performs a readiness self-check every day

### SPECIFICATIONS

**Monitor Weight**  
(without paper or cables):  
12.3 lbs. (5.58 kg)

**Module Weight:**  
3.6 lbs. (1.3 kg)

**Dimensions:**  
8.4" x 10.3" x 10.3"  
(21.3 x 26.2 x 26.2 cm)

**Dimensions with Module:**  
10" x 10.3" x 11.7"  
(25.4 x 26.2 x 29.7 cm)

**Display Size:**  
4.53" x 3.4"  
(11.52 x 8.64 cm)

**Monitoring Plus SpO2:**  
210 minutes  
(5 on low battery)

**Monitoring Plus Pacing**  
(100ma, 60 ppm) and SpO2:  
110 minutes  
(2 on low battery)

**Defibrillation**  
(360J discharges):  
140 minutes  
(3 on low battery)
