

Cranwall™ Blades

American Profile

Laryngoscopes

With Conventional Illumination

CRANWALL™

A modification of the Miller that retains the extended curved tip to facilitate in lifting the epiglottis. The Cranwall™ blade has dramatically reduced the flange to allow insertion through a restricted opening, such as arthritic jaw or facial burns, and decreases potential for damage to the upper teeth. This blade has the flange removed directly below the light carrier. Blades made of surgical stainless steel.

REPLACEMENT LAMPS

5-0234-01For Sizes #0, 1, 2, 3

CAT#	SIZE	DESCRIPTION	A	B
