

Miller-Port / Phillips Blades

Laryngoscopes

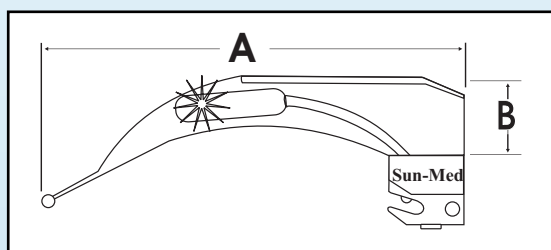

With Conventional Illumination

MILLER-PORT

The Miller-Port Blade is a modification of the Miller blade that allows the individual to perform laryngoscopy and intubation with less risk of hypoxia. Built into the Miller blade is a tube that permits delivery of oxygen or other gas mixtures during intubation. Blades made of surgical stainless steel.

REPLACEMENT LAMPS

5-0234-01For Sizes #0, 1

PHILLIPS

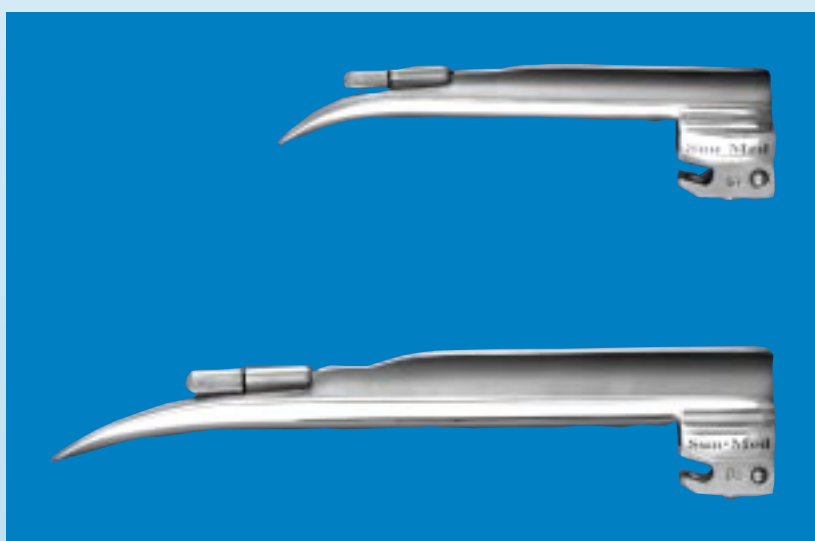

The Phillips blade integrates the preferred straight Jackson blade design with the curved distal tip Miller design providing greater visibility and an almost direct line approach to the trachea during intubation. Unique lamp mounting provides deep illumination downward and inward, while the low profile flange reduces the risks of oral damage. Blades made of surgical stainless steel.

REPLACEMENT LAMPS
