

Schapira / Snow / Whitehead

American Profile

Laryngoscopes

With Conventional Illumination

SCHAPIRA

The Schapira blade is an improved version of the straight blade. With the flange removed, this blade reduces the risk of trauma to the patient and provides excellent visualization. Blade made of surgical stainless steel.

REPLACEMENT LAMPS

5-0234-01For Size #4

CAT#	SIZE	DESCRIPTION	A	B
5-3080-04	4	Large Adult	177mm	7mm

SNOW

A modification which includes the Miller spatula and the Wis-Foregger (Wisconsin modification) flange to reduce trauma during intubation, especially for use with the Sanders tube. Curving back from the distal end, it provides a convenient visual field. Blade made of surgical stainless steel.

REPLACEMENT LAMPS

5-0234-04For Size #3

CAT#	SIZE	DESCRIPTION	A	B
5-3069-03	3	Medium Adult	162mm	16mm

WHITEHEAD

A modification of the Wis-Foregger blade with a reduced flange to increase visualization, facilitate intubation, and reduce the possibility of damage to the incisors. Blade made of surgical stainless steel.

REPLACEMENT LAMPS

5-0234-04For Size #3

CAT#	SIZE	DESCRIPTION	A	B
5-3065-03	3	Medium Adult	162mm	13mm
