GUEDEL

The Guedel blade is another original straight blade that has been modified by angling the blade 28° on its base toward the handle. This helps to promote lifting without the teeth as a fulcrum. The Guedel blade was one of the first blades designed specifically for use with cuffed endotracheal tubes. The distal tip has slightly more angulation than the Flagg to assist in compression of the epiglottis. Blades made of surgical stainless steel.

REPLACEMENT LAMPS

5-0235-01For Size #1
5-0235-04For Sizes #2, 3, 4

CAT#	SIZE	DESCRIPTION	A	B
5-3055-01	1	Infant	97mm	13mm
5-3055-02	2	Child	122mm	13mm
5-3055-03	3	Medium Adult	137mm	16mm
