

Cranwall™ Blades

American Profile

Laryngoscopes

With Fiber Optic
Illumination

CRANWALL™

A modification of the Miller that retains the extended curved tip to facilitate in lifting the epiglottis, the Cranwall™ blade has dramatically reduced the flange to allow insertion through a restricted opening and decrease potential for damage to the upper teeth. For use with arthritic jaw or facial burns.

All above blades are made from 303/304 surgical stainless steel and are provided with 4mm, replaceable fiber optic bundles. GreenLine® blades and handles are fully compliant with ISO standard 7376-3 and interchange perfectly with companies conforming to the "Green System". (i.e. Anesthesia Associates, AMS, Heine, Propper, Rusch and Welch Allyn)

CAT#	SIZE	DESCRIPTION	A	B
