

# Robertshaw / Seward Blades

## English Profile

### Laryngoscopes

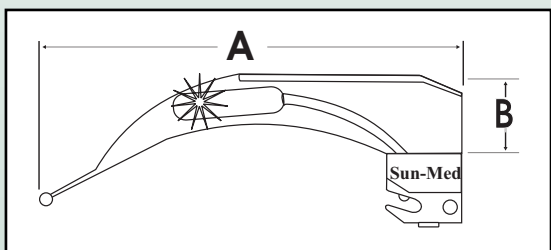

With Fiber Optic Illumination

#### ROBERTSHAW

This blade for infants and children is gently curved over the distal third and is designed to lift the epiglottis indirectly in the manner of the MacIntosh blade. The blade section permits binocular vision thus allowing better judgement of depth and consequently less risk of trauma.

CAT#	SIZE	DESCRIPTION	A	B
5-5237-00	0	Neonate	94mm	11mm
5-5237-01	1	Infant	112mm	13mm

#### SEWARD

Originally produced as an infant blade for use in asphyxia neonatorum, this pattern is now available in two sizes extending its usefulness to older children.

CAT#	SIZE	DESCRIPTION	A	B
5-5239-01	1	Infant	105mm	9mm
5-5239-02	2	Child	130mm	16mm

All above blades are made from 303/304 surgical stainless steel and are provided with 4mm, replaceable fiber optic bundles. GreenLine® blades and handles are fully compliant with ISO standard 7376-3 and interchange perfectly with companies conforming to the "Green System". (i.e. Anesthesia Associates, AMS, Heine, Propper, Rusch and Welch Allyn)
