

Polio / Soper / Oxford Blades

English Profile

Laryngoscopes

With Fiber Optic Illumination

POLIO

A modification of the English MacIntosh blade which is offset from the handle at an obtuse angle to allow intubation of patients in respirators, body jackets, and other difficult situations. It is a curved blade type for indirect laryngoscopy.

CAT#	SIZE	DESCRIPTION	A	B
5-5247-03	3	Medium Adult Angled at 120°	130mm	23mm

SOPER

This blade combines the "Z" section (outward flange) of the MacIntosh design with a straight blade. Desirable for pediatric use.

CAT#	SIZE	DESCRIPTION	A	B
5-5240-01	1	Infant	100mm	17mm

OXFORD

Suitable for premature infants, babies, and children up to the age of four. There is sufficient overhang on the open side to prevent the lips from obscuring vision and the broad, flat lower surface is a help in the small child with an extreme degree of cleft palate.

CAT#	SIZE	DESCRIPTION	A	B
5-5238-01	1	Infant	102mm	16mm

All above blades are made from 303/304 surgical stainless steel and are provided with 4mm, replaceable fiber optic bundles. GreenLine® blades and handles are fully compliant with ISO standard 7376-3 and interchange perfectly with companies conforming to the "Green System". (i.e. Anesthesia Associates, AMS, Heine, Propper, Rusch and Welch Allyn)
