

GreenLine™ PrismView™ Blades

English & American Profile

Laryngoscopes

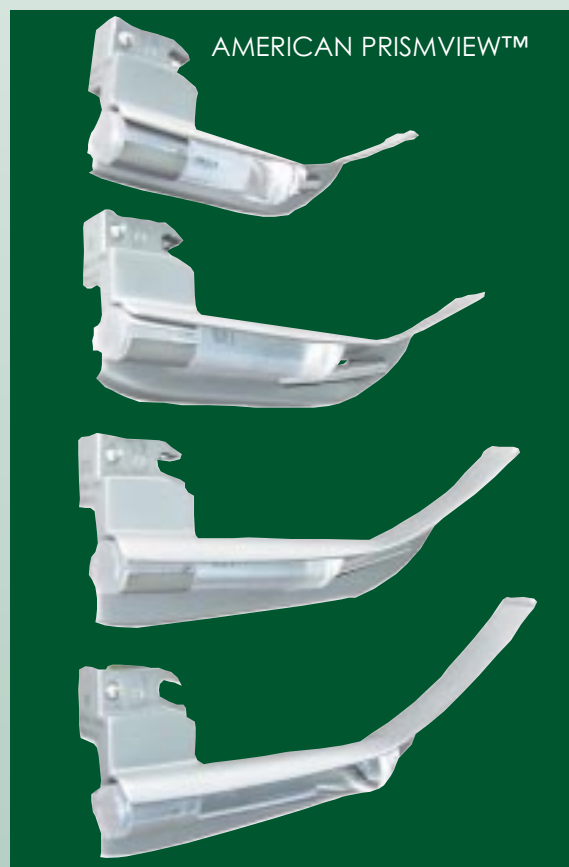

With Fiber Optic
Illumination

PRISMVIEW™

The NEW English PrismView™ and American PrismView™ blade may be used:

- when the view of the vocal cords is impaired, especially the most anterior larynx.
- during nasal intubation
- for post operative examination of the larynx.

Both contain an optically polished prism which provides a refraction of 30° without image inversion. To prevent condensation, warm the prism before use by immersing the complete unit in warm water.

CAT#	SIZE	DESCRIPTION	A	B
------	------	-------------	---	---

ENGLISH PRISMVIEW™

5-5228-02	2	Child	100mm	21mm
