

Steel TS Podiatry Unit

Ergonomic design and customizable features

The Euroclinic Steel TS Podiatry Treatment Cabinet is designed with a focus on ergonomics to maximize practice efficiency and physician comfort. The Steel TS cabinet offers rubber pivoting casters and a scratch proof working surface with anti-drop edge. The instrument console comes equipped with suction, rotational micro-motor and air/spray syringe to meet the needs of the professional podiatrist. The touchscreen display offers complete control of chair movements and basic workstation components.
