

# Intubation Stylets

## FEATURES

Shore Medical Intubation Stylets are the most adaptable, cost-effective stylets available on the market. Each stylet contains malleable wire encased in a specially designed PVC sheath which allows the Shore Medical Stylet to be used in a wide range of Endotracheal Tube (ETT) sizes while still maintaining the shape you require. With just two stylet sizes in your inventory, all ETT sizes are covered, simplifying inventory control and ordering.

A uni-directional end cap doesn't permit the stylet to advance forward during the intubation process, significantly lowering the risk of unnecessary trauma to the patient. Simply install the stylet into the ETT and engage the uni-directional end cap onto the 15mm ETT connector. Draw the frosted PVC coated wire back to the desired location, shape the ETT, and you are ready to intubate. This assures a procedure that is fast, efficient, and—most importantly—safe.

- PVC frosted-finish sheath reduces friction between stylet and Endotracheal Tube
- Single use
- Two sizes cover all ETT tube sizes
- Safety end cap prevents stylet from advancing during intubation
- Cost-effective
- Reduced diameter facilitates post-intubation removal

## ORDERING INFORMATION AND TECHNICAL DATA

Item No.	Description	O.D. Size	Recommended for Tube Sizes I.D.	Box Qty.	Case Qty.
S 1000	Adult Stylet with stop	9Fr	4.5mm - 10.0mm	20	100
