The new standard in tourniquet safety and functionality

The AT4 Electronic Tourniquet System is an innovative, dual channel electronic tourniquet that uses state-of-the-art technology to provide a superior operating experience.

Perform Biers Block regional anesthesia procedures with the AT4 Electronic Tourniquet System’s unique safety feature, preventing operators from accidentally deflating cuffs in the wrong order and potentially exposing the patient to harmful doses of anesthetic agents.

The lightweight AT4 operates from its own integral air supply and features on-board cuff and hose storage so the unit can be moved from room to room with ease. Clinicians can read the unit’s crystal-clear OLED display panel at virtually any location in the operating room. The AT4 Electronic Tourniquet System performs automatic diagnostic self-checks at every start-up, ensuring the unit will be ready to go when you need it.

Features:
- Unique IVRA (Biers Block) procedural guidance safety mechanism
- Routine automatic diagnostic self-checks at start-up and at regular intervals during use
- Precise regulators provide accurate pressure control at the touch of a button
- OLED display panel shows both pre-selected and real-time cuff pressure readings
- Audible and visual warnings alert in case of low battery, leaks and calibration
- Streamlined design for easy cleaning and mobile maneuvering
- Convenient on-board cuff hooks and quick-release cord management
- Single or dual channel operation for a variety of procedures
- Simple color-coded interface for controls, hoses and cuffs
- Cuffs deflate at a staggered rate to prevent patient discomfort
- Automatic timers with operator-set elapsed time alarm
- Pressure range: 0 - 600 mmHg
Specifications:
- Overall Dimensions: 305mm W x 385mm D x 1050mm H
- Accuracy and resolution: +/- 2.5 mmHg, displayed with a resolution of 5 mmHg
- Maximum cuff pressure: 600 mmHg
- Electrical Input: 110-120V 50-60HZ, 230V 50-60 Hz
- Battery: Sonnenschein A512/6.5 S
- Weight: 17.3 kg

**Independent displays**
Pre-select and actual cuff pressure readings

**Automatic self diagnostic checks**
On start-up and throughout use

**Precision controlled regulators**
User friendly simple to use controls

**IVRA (Bier’s block)**
Procedural guidance feature

**Automatic LCD timers**
With user defined elapsed time alarm

**Pressure range**
0 – 600 mmHg

**Visual and audible warnings**
For battery, leaks and calibration

**Positive feel push buttons**
Inflate / deflate functions

**Dual channel system**
Single or dual channel operation

**Colour coded channels**
From controls to cuff

Re-usable and disposable Tourniquet Cuffs available
