

avantehs.com/ultrasound

ISO 13485:2016 Certified

One source for complete ultrasound service, parts, and equipment

Systems • Probes • Repair Services • Parts • Rentals • Support • Training

Avante Ultrasound provides a reliable choice for customers seeking effective solutions to rising costs in the healthcare marketplace. We provide new and refurbished systems and probes, advanced probe repair, have a large inventory of OEM parts, and support our clients with certified engineers nationwide.

REFURBISHED SYSTEMS

The industry's largest inventory of fully refurbished ultrasounds

We take pride in a level of service and support that sets the bar in our industry. Our team is focused on enabling healthcare providers to consistently deliver high-quality care with a positive financial outcome. We carry market-leading reconditioned ultrasound systems and equipment from all major manufacturers to support any medical imaging facility.

PHILIPS

SIEMENS

TOSHIBA

SAMSUNG

Nationwide Service

Our technicians provide comprehensive ultrasound service solutions to facilities across the United States

Ultrasound Probes

In addition to our large inventory of ready to ship probes, we offer state-of-the-art repair services.
Save thousands

Parts & Supplies

We provide quality imaging system parts, probes and transducers from popular platforms, as well as nuclear camera equipment.

ULTRASOUND TRAINING

We are committed to empowering the Biomed community with cost-effective, hands on, and practical training programs.

RENTALS

Our large, nationwide fleet is ready to meet your short-term clinic needs as well as satisfy budgetary considerations.

SAMSUNG POINT-OF-CARE PARTNER

Avante is an authorized partner and provides Samsung's comprehensive line of diagnostic ultrasound equipment for "point-of-care" environments in hospitals and private practices. The Samsung portfolio is designed to meet a broad set of imaging needs, ranging from compact, portable systems to full featured, multi-disciplinary systems.

SAMSUNG Comprehensive "Point-of-Care" Solutions
