

## Easy to use digital desiccator provides power control on the handpiece and the unit

### Great for dermatologists, facial plastic surgeons and family practice physicians

- » More power with 40 watts
- » More accurate bi-polar increase and decrease in 1/10<sup>th</sup> watt increments from zero to ten watts
- » More accurate power with Universal Power Control – 100 - 240 VAC
- » More user-friendly with features that can save you time and money
- » Less to do with fewer steps to accomplish the same procedures
- » Less to buy – fewer accessories needed for additional functionality
- » Foot control activation is available and can help you keep the handpiece steady

**Digital Error Detection** means unsurpassed safety for you and your patient. The Aaron 940™ continuously monitors every aspect of the unit's output. At the sign of any problem, the machine instantly disables the output and displays the appropriate error code on the display.

### The Bovie® 3-Button Handpiece — better by design, inside and out

The basic function of a 3-button handpiece is to allow the user to control power up/down and to activate the high frequency desiccator. The Aaron 940 has a technological advantage in the handpiece: a superbly engineered collet that is gold plated for superior conductivity. The collet is attached to our circuit board and the entire handpiece is encapsulated and formed in a high tech polymer that combines comfort for you with a sure grip. The buttons on the handpiece have been designed for superior tactile feel and comfort. Finally, it's autoclavable so you can have sterility when you need it, and an easy-to-clean and durable handpiece all the way around.

# Bovie Aaron 940

High Frequency Desiccator

Equipment for the way *you* operate

## Less to buy...

The same 3-Button Pencil works with or without the optional footswitch!

## Less to do...

Simply plug in the optional footswitch and you are ready to go! Not only is the Bovie footswitch much more cost effective, but you don't need to replace the handpiece like you do on other devices. The user has complete control including up/down power from the handpiece as well as activation...you may have neither with other units. The Aaron 940 is not only more user-friendly — it also saves you money!

## Power Control

Change the power setting with one action, using the rotary power-control dial or the up/down buttons on the autoclavable handpiece.
