

DRE Anetic-P

Mobile Surgery Table (Powered)

Equipment for the way *you* operate

The complete multi-purpose mobile surgery table

Powered patient trolley/operating table is a total solution for hospitals and surgery centers.

The DRE Anetic-P is more than a surgery table. It is a complete surgery solution that can move patients from the pre-operative area to the operating room and then to the recovery area — with no need to transfer the patient from a stretcher to a surgery table and back. The Anetic-P does it all by incorporating the mobility of a stretcher into a multi-purpose surgery table.

Features

- » Four remote-activated powered functions
- » Lateral tilt
- » Excellent stability
- » Full C-arm coverage
- » Superior surgical access
- » Traversing patient platform
- » 550-lb. (250-kg) weight limit
