

**DRE Envoy PDM** | Patient Data Management System

Monitor patients throughout your facility from a single location with DRE's all-in-one touchscreen central station

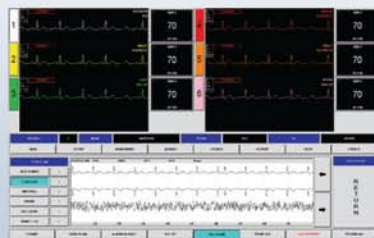

(800) 477-2006 | [www.dremed.com](http://www.dremed.com)

## All-in-one wireless central station monitor

Track vital signs and manage patient data from pre-op through discharge

- Wirelessly monitor vital signs of up to six patients throughout your facility from a single location
- Large, color touchscreen that is easy to use and provides immediate operation
- About the size of a 15" computer monitor and doesn't require a separate telemetry receiver
- Software features auto charting; full disclosure (96 hours); auto generation of alarm events; manual recording—ECG analysis; trends, charts and strips for arrhythmia; detection of ECG data; and color waveforms (20 colors). You can also schedule the printing of reports and connect the Envoy PDM to your network.
- Automatically compiles and archives user-selected discharge reports. On networked systems, discharge reports can be sent in PDF format to hospital management systems.

### Easy-to-use touchscreen interface

Review, edit and enter patient information while you observe all patients in the system.

Vital signs monitors for example only – a DRE sales representative can assist you with patient monitoring options.
