

Bright, clean, and even field of illumination

You can now upgrade any of your older model DRE or BFW halogen headlights to LED with our conversion kit. Easily and affordably convert your light to LED with a new LED light harness, lithium ion battery pack and charger. As long as your headlight was manufactured after 1995 with the rectangular bulb housing, the conversion will work.

The **DRE Xavier C3 LED Conversion Kit** provides a bright, clean and even field of illumination. With all of the features of the DRE Xavier C2, the C3 has the added intensity, longevity and brilliance that LED technology now provides.

The Xavier C3 LED conversion kit applies advanced High Beam TriLens technology for the result of unequaled clean, bright, adjustable and well-focused large spot of light.

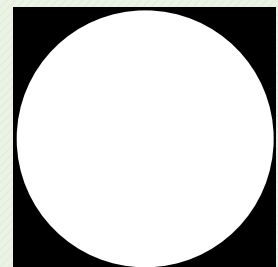

The Xavier C3 Lithium Battery Pack with Intensity Control provides 7.5 hours of highest intensity light with up to 600 recharges.

Increased Power and Comfort
7.5 Hour/ 6 oz. C3 Lithium Pack
with Intensity Control

Never a Lamp to Replace
