

GE Mac 1200

EKG Machine

A comprehensive solution with practical features

The GE MAC 1200 Resting EKG machine is a complete solution for private practices and small hospitals. This unit is GE's evolution of the previous Marquette brand. The MAC 1200 is a compact 12-lead electrocardiograph designed for acquisition with or without analysis. The system can be configured as a standard electrocardiograph (ECG/EKG) without analysis for facilities with minimal requirements. The system can also be configured to incorporate the 12SL (ECG/EKG) analysis program. Adding the 12SL program creates an electrocardiograph with the industry leading interpretation program and measurements.

This refurbished MAC 1200 Basic includes: Interpretive Electrocardiograph with 12-lead analysis, Waveform Display, Full-sized paper format, Alphanumeric keypad, patient cable, paper, power cord.

FEATURES

- Comprehensive solution for ECG requirements.
- Waveform LCD display.
- Interpretive EKG.
- Full size paper reports.
- Portable with built-in battery.
- Measurements, interpretation and memory available in any combination.
- Simultaneous 12-lead ECG acquisition and analysis.
- Compact, lightweight design with carrying handle.
- Field upgradability.

SPECIFICATIONS

Weight:
12.4 lbs (5.6 kg)
with graphics display
and battery

Width:
14.5" (370 mm)

Height:
3.7" (94 mm)

Depth:
12.6" (320 mm)

Frequency:
49 - 65 Hz

Battery Type:
NiCad, 18V, 1.4 Ah

Battery Charge Time:
4 hours

Display Type:
LCD 320 x 240 pixel,
backlit, contrast adjustable

Writer Type:
Thermal array print head

Acquisition:
12 leads, simultaneously

Signal Input:
Type CF according to IEC
